

Paytm Merchant AI Teammate

"AI teammates that don't just respond; they get the job done."

An autonomous execution agent for Paytm merchants — discovering issues, taking proactive actions, and driving growth with zero human intervention.

Don't Just Respond

Takes real-world actions without waiting for prompts

Gets The Job Done

Dispatches WhatsApp dues reminders, restocks & promo campaigns

Enterprise Grade

Built on Gemini 3.6 + LangGraph autonomous agent loop

The Problem: Chatbots Answer Questions, They Don't Get Work Done

THE REACTIVE TRAP

Chatbots are Passive

Current merchant bots sit idle waiting for queries. But busy merchants do not have time to query dashboards or ask for daily advice.

THE EXECUTION GAP

Insight Without Action is Zero

Alerting a merchant that "₹25,000 is overdue" is useless if the merchant still has to spend hours making uncomfortable recovery phone calls.

MERCHANT TIME DRAIN

Operational Overhead

Managing inventory, tracking dead stock, and crafting promo offers requires an analyst. Merchants need an autonomous colleague, not a Q&A tool.

Our Solution: An AI Teammate that Gets the Job Done

Proactive Autonomous Audit

Triggers a full business scan across GMV, overdue balances, and inventory velocity without waiting for user commands.

Autonomous Dues Recovery

Drafts and dispatches personalized WhatsApp reminders with direct Paytm UPI payment links to overdue customers.

Autonomous Dead-Stock Liquidation

Identifies capital locked in slow stock and drafts custom promotional campaigns ready for merchant broadcast.

Autonomous Predictive Restock

Forecasts stock run-rates, flags imminent stockouts, and prepares vendor restock orders proactively.

Architecture: The Autonomous Teammate Decision Engine

1. Paytm Telemetry

Merchant Data Stream

Ingests live merchant transaction streams, settlement balances, receivables, and SKU turnover.

2. Agentic Reasoning

Gemini 3.6 + LangGraph

Autonomous ReAct loop with multi-model fallback (Gemini 2.5/3.6) that plans and decides next actions.

3. Tool Execution

6 Autonomous Tools

Executes real actions: sends WhatsApp reminders, drafts promo offers, calculates reorders, generates summaries.

4. Transparency UI

Action Feed & Chat

Streamlit dashboard with live interactive chat and an audit-proof Action Feed showing every tool executed.

Measurable Business ROI & HackBriven Demo Flow

60-Second Demo Walkthrough for Judges

1. Open Dashboard: Review merchant financial metrics and receivables.
2. Click "Run Full AI Scan": Agent autonomously executes 5+ tools.
3. Review Action Feed: Inspect actual dispatched WhatsApp reminder payloads.
4. Test Custom Query: Ask follow-up questions to demonstrate persistent conversational memory.

Rs 25,000+

Cashflow Recovered / Month - Via automated polite WhatsApp payment reminders

10 hrs / wk

Merchant Time Saved - Zero manual ledger calculations or follow-up calls

Zero Cost

Free Tier Deployment - Powered by Gemini Flash API - accessible to every Paytm merchant
